TEACHERS COLLEGE OF PITTSBURG

"THE ONLY WAY TO HAVE A FRIEND IS TO BE ONE"

*The*

HATTIE MOORE  
MITCHELL

# DEDICATION

To Dean Hattie Moore-Mitchell, counsellor and leader of girls, whose severest truths, heartiest counsels and affectionate impressions are recognized by all girls who cherish the warmth of her friendship. Her latitude of love and longitude of loyalty has inspired every girl to develop her own personality to the fullest, thus creating truer and more sympathetic friendships. It is with a feeling of genuine appreciation of her work that we dedicate this 1933 Friendly Kanza to her.

---

# Friendship

*is what we make it..*

EMBODIED in it are some of the finest of all human virtues, making life nobler and more enjoyable for those who are true friends. There are many outstanding friendships of history, some of which were the direct cause of changing the course and destiny of nations. The Friendship of one for another has often resulted in the supreme sacrifice as illustrated by the Biblical verse, "Greater love hath no man than this, that a man lay down his life for his friends." Our friends and the depth of their feeling for us is limited only by our capacity for friendship. It must always be merited; it never comes without students, and students and faculty, than ever before. This is particularly true of our own campus. Throughout its myriads of activities we play and

work together, dream, build castles and plan for our lives ahead. With others we share these experiences, and the degree of which is determined by the depths of our own friendships. And so when one of the greatest things in college life is friendship, we feel it is only fitting and proper to give recognition to it. It is used, therefore, as the theme for this book. A few pages back you saw a picture of "Prexy" in his office exemplifying this thing of which we are talking. No one on this campus is more democratic in spirit, a greater friend to all than prexy—most beloved president in the country. No other thing could be more fitting for this book than that friendly spirit which is possessed on this campus by the head of this institution on down. Friendship rules the campus. The Dean of Woman and the Dean of Men whose hearty attempt it is to create

the spirit of friendliness, should be given official recognition. Throughout this volume, the aim has been to picture all of those who have spent the year here; to record those who are and who have friends; to show in a small measure at least, actual pictures of events and occasions where friendship has been strikingly paramount. Sally and Bob leave Widenroad and come to college. Old friends, manners and customs are left behind. A new life opens and adjustments must be made. Perhaps their first official contact with the college is Annual Freshman Day. Here, to their somewhat bewildered minds, are unfolded some of the intricacies of college life. It is a new world opening to them, full of hope and anticipation. The beginnings of new friendships are born, kindred spirits find much in common and then, September 13, Enrollment Day. A maze of tables, cards, schedules, long lines of people and the incessant hum of busy voices. Then evening. Well that's that.

Tomorrow the fun begins. It did! The next is a saunter to the football field. Bump, thud, c-r-unch! That's hard work for sweltering September days. But it was all worth while—sez you—for the boys in gold shocked the Shockers 14-0. The next day Sally and Bob do a little "looking-down-on" themselves. The occasion is the Annual Play Day when several hundred high school girls come to the college for a day of exercise and indulge in a day of various recreations and plays.

**A**T LAST the Freshman boys could throw out their chest a little and s-t-r-u-t. Political candidates, all-school parties, dances, formals, dramatics, intramural games and other activities occupy the remainder of the fall months. Additional friendships are formed—for some of the politicians, not enough—and then home for the holidays. Back again! The frantic rush to complete notebooks—friendship certainly comes in handy now—worry about finals and then a long breath. The first semester is over. A week-end with no lessons to study, and then those long tables, enormous crowds and lots of conversation again. It's enrollment time once more but not so bad this time. We're catching on to the ropes and picking "friendly faculty" members to help out in making our schedules. All this time "Jawn" Lance is showing the rest of the conference how to put the little leather ball through the net-bound hoops. The Shockers had another little lesson when their grain was threshed 52-22. That's making 'em decisive, and maybe it was one place where certain friendships were NOT made. Studies, the Spring Festival, the traditional Messiah, long slow walks on moonlight nights, (you know the kind, "Anyway we can be friends, can't we?") and then the Seniors don caps and gowns. It's Commencement,

and another class is graduating and adding to that vast group of alumni, strong, friendly and loyal. Sally and Bob and the class of '33, along with all others, look back upon an epoch year and recall its joys and sorrows, murmur—

*and What A Year It Was!*

"Thou Wert My Guide,  
Philosopher and Friend."

Management of institutions of higher education in Kansas is in the hands of a State Board of Regents. Members are appointed by the governor of the state. The State Board of Regents was established for the purpose of administering state schools within the limits and accomplishments of higher education. The Board visits the state colleges and universities frequently and seeks to bring about all functions of the state schools into an effective educational program.

The 1933 KANZA . . . . .

W. A. BRANDENBURG, LL. D.  
President

The Kansas State Teachers College of Pittsburg is to be congratulated on having as its leader one whose untiring efforts to serve its students, alumni, and patrons have made him the friend of all, President W. A. Brandenburg.

G. W. TROUT, A. M.  
Dean of College

Dean Trout whose duties and responsibilities bring him in contact with so many students in different circumstances, has displayed rare qualities of patience and understanding in his role as a student adviser.

*The 1933 KANZA . . . . .*

HATTIE  
MOORE-MITCHELL, A. M.  
Dean of Women

Such duties as attending to the needs of all women students, consulting with them on their varied problems, and managing Willard Hall fall on the shoulders of her to whom this "Friendly Kanza" has been dedicated: Dean Hattie Moore-Mitchell.

GEORGE SMALL, B. S.  
Acting Dean of Men

That human bundle of energy, that inspiring personality, that friendly, contagious smile, and that natural desire to serve others belong to our friend and adviser, Dean of Men, George Small.

The 1933 KANZA . . . . .

## GENERAL OFFICE

I am sure that faculty, alumni, the student body, and the public in general need no explanation as to where the general office is located. Occasionally on the first day of an enrollment when we move the general office, so to speak, to the gymnasium, and some freshman student is asked to report at the general office the next morning, he invariably says, "Just where is that?" Students soon discover the location of the general office if through no other method than a search for the student mail box.

As the name would indicate, the general office is a sort of "clearing house" for the business activity of the college. The office has charge of all finance matters, tuition, fees, admissions to athletics, contests, concerts, plays, loan funds, dormitory rents, cafeteria receipts, and the routine process entailed in the expenditure of such funds. In administering the duties of the office it is our desire to be efficient, accurate, courteous, and at all times to be of the greatest possible service to the faculty and student body.

**R**USS Hall, the administration building and first building on the campus, was erected in 1908. It was named in honor of principal R. S. Russ, a noted executor and instructor.

During the summer school term in 1914, a bolt of lightning not only destroyed Russ Hall, but endangered the very existence of the college itself. Immediate and decisive action was necessary if summer school were to be continued. Consequently the citizens of Pittsburg rose to the full height of the occasion and within thirty-six hours had pledged \$136,000 for the rebuilding of Russ Hall, which was in use the following year.

RUSS HALL

## COMMERCE

Business is a pecuniarily organized scheme of gratifying human wants, falling little short of being as broad, as inclusive, as life itself in its motives, aspirations, and social obligations. It falls little short of being as broad as all science in its technique. Training for the task of business must have breadth and depth comparable with that of the task.

A study of business is a study of business theory and its application. The department of commerce includes in its curricula not only courses which are of a technical nature but those aiming to train the student to analyze business problems as they present themselves in actual business life. The present economic depression calls to mind the possibility that too few business men have learned well to analyze such problems and to find a remedy which will cure business ills.

The department aims to prepare the student along two slightly different lines of service. The training of commercial teachers has always been the major task of the department and hundreds of its graduates are teaching in the schools of the mid-western states. The second line of training is that offered along the line of Business Administration, which has just been added to that of teacher training.

The teaching staff of the department consists of six members—W. S. Lyerla, A. M.; Head of the department; J. U. Massey, M. S.; Willa M. Dush, A. M.; Lillian I. Miller, A. M.; L. C. Guffey, B. S.; and Hallie Bennington, B. S.

To the student body and alumni we extend greetings and sincerely hope that whenever you need any service that we can render, you will not hesitate to call on us.

# ENGLISH

The plan of the department is to keep abreast of the times without going to the radical. We want to prepare teachers for the best high school positions, and we want them to make good. We want our teachers to know the fundamentals in spelling, in punctuation, in pronunciation, and the right use of words. So far the output has been about equal to the demand, for teachers so prepared.

The faculty this year is nearly the same as last: I. G. Wilson, A. M., Tyson Wycokoff, Ph. D., J. Gordon Eaker, Ph. D., Ernest Bennett, A. M., Elmina Graham, A. M., Margaret Haughwout, A. M., Dora Robertson, A. M., Edna Hays, A. M., Edna Powell, A. M., and Adele M. Burnett, A. M.

The English faculty have contributed several books on English: "Pittsburg College Verse;" "Sheep's Clothing;" "Words, Words, Words;" "Grammar by Example and Exercise;" "A Handbook of Grammar;" and two more are in manuscript ready for the printer, "Punctuation for Writers," and "Letters of a Selfmade Business Man to the Professor of his Daughter, Mary Ann."

# EDUCATION

Progress in the Department of Education is denoted by the addition of two new curricula leading to the degree of B. S. in Education in two important fields, as follows:

1. Educational Administration and Supervision for high school principals, supervisors and superintendents.

2. Elementary School Administration and Supervision for elementary-school principals, supervisors and critic teachers.

The staff of the department of Education for the present year is as follows: C. W. Street, Ph.D., Head of Department, D. M. Bowen, A.B., E. N. Mendenhall, A.M., Ralph A. Fritz, Ph.D., Ernest M. Anderson, Ph.D., Hattie Moore Mitchell, A.M., W. E. Matter, M.S., Edna Hays, M.A., Temple Hill, A.M., Hallie Bennington, B.S., E. E. Stonecipher, M.S., Flora E. Holroyd, A.M., Jane Carroll, M.S., Ethel Moore Peck, M.A., Velda Williams, B.S., Thelma Carnagey, A.M., Avis Grawe, M.Ed., May Hare, M.A., Daphine Cross, A.M., Gladys Rinehart, A.M., Callie King, A.M. The fellowship in the department is held by Ruth Marguerite Grotheer.

## FOREIGN LANGUAGES

Languages are gateway subjects. Our doctors talk Greek, our grammarians talk Latin; our scientists talk German, our diplomats French, our radio a large number of social arts and sciences; not only artists Spanish. Foreign language study embraces this, but it weaves into a united whole the study of the geography, history, psychology, philosophy, and art, with the language and literature of the people themselves. Less and less are foreign language teachers training students in parrot-like repetitions of a few phrases; more and more are they stressing social aims, especially civic.

Our department faculty is looking forward professionally. Miss Howe recently spent a summer in Europe; Mrs. Guernsey spent a year in Madrid, and last summer reviewed Italian at the University of Arkansas, which has one of the strongest Italian courses in the nation; Mr. Pease has recently received his advanced degree from the University of Chicago.

Cordially yours,

SAMUEL J. PEASE

The 1933 KANZA

# HISTORY

Through the pages of the Friendly Kanza the Department of History and Social Sciences wishes to greet its many friends, alumni, students majoring in the department as well as the minors.

It is not necessary for us to call attention to the increasing importance of at least a general knowledge of the history of the evolution of human society in its social, political and economic relations. Never before have we needed more wisdom and better understanding of these relationships than at the present time.

The work of the department is not only offered to the undergraduates on a high to lead students in these fields as follows: Elizabeth Cochran, Ph. D., Ernest Mahan, Ph. D., Lula McPherson, A. M., O. F. Grubbs, A. M., O. A. Barr, A. M., J. C. Straley, A. M., and E. N. Howell, B. S.

The work of the Department is not only offered to the undergraduates on a high level, but also offered to the graduate division both for majors and minors under the direction of experienced teachers in the field of history.

# MATHEMATICS

The department of mathematics is endeavoring to serve the needs of all students who need training in quantitative thinking and skill in computative processes. As every branch of learning develops it becomes quantitative in character, and these definite relations are most briefly and accurately stated in the symbolism of mathematics.

There is a beauty in the logical process of mathematics that should make an aesthetic appeal to those familiar with them. We emphasize the beauty of mathematics as well as its utility.

A well graded sequence of courses, from a course in Elementary Mathematics designed for teachers of arithmetic, two strong graduate courses in mathematics, present every aspect of mathematics essential to a liberal or technical education.

## PSYCHOLOGY PHILOSOPHY

Each year calls our attention more fully to the importance of the science of psychology in the fields in which it is applied. More and more it is called upon to help in solving problems in household law, as well as medicine and industry. It is the common conviction that the science and art of teaching is based upon the science of psychology.

The function of this department is to provide psychological principles which govern in educational procedure as well as to provide a basis for a liberal education. It is our aim to offer courses to meet the requirements of students who wish to pursue advanced work in psychology or philosophy in a university.

In addition to under-graduate work the department is offering work leading to the Degree of Master of Science.

Sigma Phi Mu is the honorary fraternity for the department organized in Feb. 24, 1927 by faculty and students who were especially interested in the fields of psychology and philosophy. Its aim is to promote the ideals of scholarship, leadership and friendship.

The department has three members on its staff. Charles Bertman Pyle, Ph. D., head of department, J. A. Glaze, Ph. D., and Paul Murphy, Ph. D.

## RURAL EDUCATION

Rural Education is the biggest task in Kansas and is a subject of growing importance. More than half of the elementary school children of Kansas attend the rural school and three out of every five Kansas teachers teach in a rural school. Too little attention is being given to the training of this important phase of education.

The rural department with a continuously increasing enrollment in its classes seeks to do what it can toward the effective preparation of rural teachers, and at the same time assist those who are teaching by advising and helping in their school and community work.

## SPEECH

The influence of the work done in the speech department is felt in all walks of life as well as in all the departments of our educational institutions. This department attempts to give students that manner of ease in public appearance which will reflect pure English speech and an alert presence of mind.

Not only does it attempt to cultivate this stage presence, but it attempts, also, to develop in the individual the art of pleasing conversation. After all, it is through this medium that we establish our personal contacts, and according to Publius, the philosopher, "Speech is the mirror of the soul."

## HIGH SCHOOL

The College Junior-Senior High School is a training school organized and operated in connection with the various departments of the Kansas State Teachers College at Pittsburg. This unit covers the work of the seventh to twelfth grades inclusive. This training school is used as a laboratory for the training of college students in their major fields preparatory to their going out into the teaching profession.

It is well staffed by highly qualified supervisors who are experimenting with the latest methods in teaching. The students enjoy the use of the well-equipped, commodious college buildings and laboratory equipment, including the college gymnasium and the Porter Library. Opportunity is provided for participation in the usual high-school activities, such as musical organizations, dramatics, athletics and clubs.

## EXTENSION

It is the purpose of this department to provide an opportunity for those who are unable to attend college, to advance educationally by taking correspondence courses or attending extension classes of evening or on Saturday.

## RESEARCH

If it should be desirable to select a motto for research, perhaps none would be more fitting than the words of Lucretia Mott, "Truth for authority, not authority for truth." The mental attitude expressed by these words if more generally held by students, teachers and the public in general would likely be a forward step in a better solution of social, economic, religious and educational problems and thus lead to a higher level of living for all.

## SERVICE BUREAU

Greetings from the Service Bureau. If our efforts in your behalf have not measured up to your expectations we trust you will temper your judgment with mercy.

If, in any small degree, we have been able to render some service to you we are happy.

If at any time we can help in any way we shall be glad for the opportunity to serve you.

Together we must keep faith in the future.  
S. L. Householder.

## Y. M. C. A.

It has been a pleasure for me to associate with the men students of this institution in regards to their problems relative to Y. M. C. A. work. A program consisting of such speakers as Harold Colvin, "Jack" Harte, Strong Hinman, and Arthur Rugh was sponsored by the local Y. M. C. A. members.

## Y. W. C. A.

It is a genuine joy to me to extend greetings through the FRIENDLY KANZA to each student of K. S. T. C.

Greetings, Friendly Greetings,  
Yes, they're in the air—  
Classrooms, campus, hallways  
Feel them everywhere.

Jennie C. Walker.

## CAFETERIA

A genuine pleasure comes to us daily as we watch happy, healthy, hungry young people gather about the tables at meal time.

Who was it who said,  
"We may live without poetry, music and art,  
We may live without conscience and live without heart,  
We may live without friends, we may live without books,  
But civilized men cannot live without cooks."

Cordially,  
Mrs. Maude Simpson.

The 1933 KANZA

SCIENCE Hall was built during the war at a cost of \$270,000 and is one of the finest college buildings in Kansas.

The following Departments are quartered in this building: Biology, Chemistry, Smith-Hughes Vocational Education and Home Economics, respectively.

The college auditorium is also located in Science Hall.

SCIENCE HALL

# BIOLOGY

A knowledge of the principles and facts in Biology is a prerequisite to the proper understanding and solution of the major social problems of today. It is the purpose of the Biology department to teach those facts and principles of biology that are needed in the solutions of the problems of Agriculture, Home Economics, Health and Health Education, and Biology.

It has been the aim in the organization of the department to have well qualified men in charge of each field of biological instruction. Four men in the department have their Doctor's Degree. Dr. J. R. Wells has organized and is in charge of the instruction of bacteriology and health education; Dr. H. H. Hall has the courses in ecology, field biology and elementary biological education; Dr. George M. Plagens teaches the course in Anatomy, Physiology and Morphology. Prof. Claude Leist, A. M., teaches the elementary courses in botany, zoology, histology and embryology. Prof. J. A. Trent, A. M., is in charge of the teacher training and Prof. G. E. Ruggles, M. S., has the courses in Agriculture.

# CHEMISTRY

Some knowledge of the sciences included in this department are basic to a general education. Any changes in materials of any kind involve the principles contained in the scope of its work. Test this statement by trying to find some invention or material change that does not require a knowledge of chemistry or physics or both.

Fifty per cent of the instructing staff has attained the highest level in academic equipment. The others have the Master's degree, and part of these are well on the way to the doctorate. Each member of the staff has had a wide industrial and technical experience in addition to his training in teaching.

Our staff consists of the following:

G. E. Abernathy, M. S. and E. M., Professor of Geology.

W. B. Parks, Ph. D., Professor of Chemistry.

L. C. Heckert, Ph. D., Professor of Chemistry and Physics.

O. W. Chapman, Ph. D. Professor of Chemistry.

W. H. Matthews, A. M., Associate Professor of Physics.

E. W. Jones, E. E., Associate Professor of Electricity and Physics.

Margaret Coventry, M. S., Assistant Professor of Chemistry.

J. A. Yates, Ph. D., Head of Department.

## HOME ECONOMICS

The home economics department extends its congratulations and good wishes to the graduating class of 1933. It also sends greetings to its former students and graduates who may be turning the pages of the "Friendly Kanza."

The department has broadened its scope in the last two years to include graduate as well as undergraduate courses. A number of its students have already received the Master's degree. The primary aim of the department is to prepare teachers but by careful selection of courses the student may also be prepared for other fields of remunerative work.

There are eight members of the staff in the department. Annie Marriott, M. A., Columbia University, is in charge of the foods and cookery and directs the cafeteria; E. Louise Gibson, M. A., Columbia University, teaches methods, supervises student teachers and is in charge of the home economics classes in the College High School; Pearl Garrison, M. A., Columbia University, is in charge of the clothing and textile work; Helen Hass, M. A., Columbia University, directs the art work; Rose Cologne, M. S., Colorado Agricultural College, is in charge of the teacher training in home economics under the Smith-Hughes Vocational Education law; Frances Gillum, M. S., University of Texas, teaches nutrition and is in charge of the home management house; Blanche Glidewell, B. S., is instructor in vocational home economics and in charge of the homemaking cottage at Frontenac.

Josephine A. Marshall, M. A., Columbia University, is head of the department.

## CAMPUS VIEWS

# GEOGRAPHY

It is the aim of the staff of the Geography Department to organize and offer such courses as will be of practical and cultural value to the student in whatever field he chooses to enter, whether it be business, professional or industrial. Business carried on under modern conditions demands a knowledge of the four corners of the earth, of resources of all regions, of the world's trade routes, and of the climatic and physical characteristics of all lands.

The importance of world vision on the part of the citizen cannot be over emphasized. In the task of inculcating the world understanding and world citizenship through a sympathetic understanding shared by the great mass of citizens of all nations the teacher must play a prominent role. A knowledge of geography is necessary for this sympathetic understanding. The faculty are: Eulalia E. Roseberry, A.M.; Claude O. McFarland, S.M.; and Etelka Holt, S.M.

## GEOLOGY

Geology is one of the important fields of Science. It connects the Biological and Physical Sciences, as it applies the facts and principles of these large divisions of the Sciences in a very useful way.

No one is broadly educated or cultured who does not have a knowledge of the fundamentals of Geology.

The history of the earth on which we live is recorded on its pages (rock strata), its changes that may be read from its surface, its wealth of man's wants of minerals of its crust. Its contributions to the culture, advancement and happiness of mankind are as large as any subject in college. Students specializing in other subjects will find one or more courses in Geology valuable as elective courses.

**H**ORACE Mann Training School, which is located in the first block north of the college campus, was completed in the late fall of 1927 and is one of the best arranged structures for its purpose in this section of the country.

The building is modern in every manner, well lighted, well ventilated and fireproof. It is the home of the kindergarten and the first six grades. Its arrangement is of a unit plan with one general assembly room and two work rooms for each grade.

HORACE MANN

## HORACE MANN TRAINING SCHOOL

The Horace Mann Training School is a complete elementary school containing the Kindergarten and first six grades. The purpose of this school is twofold: to aid the child to live in a satisfying way, and to train students who expect to teach in the elementary grades of the public schools. Each grade has a suite of three rooms and is supervised by a supervisory teacher who has been trained for the double duty of training students to teach and of teaching children. The supervising principal directs the school.

It is only through proper child training that effective, well-balanced teacher training may be secured. The child is the "center of gravity" in the Horace Mann School. This is being emphasized constantly in all grades, and the results are measured as objectively as possible through a standardized testing program which includes both achievement and mental tests. These tests are given three times a year so each child's improvement may be systematically measured, and also be placed where he may make the best of his abilities.

The Horace Mann faculty consists of: Jane M. Carroll, A. M., Principal; Callie King, A. M., sixth grade; Gladys Rinehart, A. M., fifth grade; Daphne Cross, A. M., fourth grade; Avis Grawe, M. Ed., third grade; Thelma Carnegie, A. M., second grade; Velda Williams, B. S., first grade; and Ethel Moore-Peck, M. A., kindergarten.

# HORACE MANN TRAINING SCHOOL

Each month one grade is responsible for an assembly program to which all the parents, student teachers and children are invited. These programs center around such activity units of the school's work as: Columbus Day, Christmas, music, physical education, arithmetic, etc. A demonstration of such work was given this year at both the State and the County Teachers Associations.

"Student teaching" is the most important professional course in the teacher training program. It demands of the student a social as well as an individual responsibility, and a realization that he can serve his own interests best only by serving well the group that he is helping to teach. The recommendation he will receive as a teacher depends on the way he meets these demands.

The Training School is the gift of the City of Pittsburg to the College and is one of the most complete and thoroughly equipped schools of its kind in the country, with its kindergarten and class rooms and gymnasium it serves a long felt need on the part of K. S. T. C. for a much-needed increase in facilities.

The curricula for kindergarten-primary, intermediate and rural teachers have been organized. A four year curriculum leading to a degree in elementary education has been prepared. Definite sequences of graduate courses have been provided for elementary and high school teachers, supervisors and administrators.

All of these changes enable us to look forward with greater confidence to the task of training teachers to meet the demand of a changing civilization.

INDUSTRIAL Arts Building was the second structure to be erected on the campus and used exclusively for applied arts and industrial arts.

In 1911 the legislature appropriated \$20,000 for the construction of the Industrial Arts Building which was ready for occupancy in 1913.

Industrial Arts is the home of the Kanza and all printing for the college is furnished by this efficient department. The following departments are located in this building: Woodworking, Printing, Machine Shop, Drawing and Art.

INDUSTRIAL ARTS

# INDUSTRIAL EDUCATION

The need for teachers of industry, known twenty-five years ago as manual training teachers, brought this institution into being. It was a pioneer in this field. Significant and numerous are the changes which have taken place during the last twenty-five to thirty years in the field of Industrial Education.

These involve terminology, philosophy, practices, definition of objectives and methods of instruction. Those who have labored in this department have a happy consciousness of contributing to the promotion of these forward movements and are mindful of our task of safeguarding and maintaining the reputation which has been builded in this field of teacher training.

While we cannot refrain from reflecting with pride upon the work that has secured this department its enviable reputation, our look must be forward and not backward. It shall be our policy to continue to prepare superior industrial arts teachers and directors of industrial education to meet constant changing conditions. 'Tis true that there is a lull in the placement of industrial teachers as in all other fields of education, but we sincerely believe that as the economic depression which has enveloped the nation for the last three or four years begins to lift and the wheels of industry again begin to revolve that there will be a renewed demand for teachers of industry which will again be beyond our ability to supply.

The sub-divisions of this department are more numerous than are usually found in a department of this kind. They are: woodworking, metal working, automobile mechanics, drafting and design, and printing.

The department faculty is: C. R. Wasser, F. H. Dickinson, G. E. Braley and F. K. Bryan in Woodworking; E. W. Baxter in Metalworking; H. V. Hartman in Automobile Mechanics; O. A. Hankammer in Drafting and Design; and O. C. Young, R. J. Nevins, W. J. Newell and F. O. Runyon in Printing.

# WOODWORKING

The Woodworking division of the Industrial Arts Department is made up of the following shop units: Bench Woodwork, Cabinet Making, Pattern Making, Finishing, Millwork, Wood Turning, Foundry and shop for Junior and Senior High School practice teaching.

In Bench Woodwork the aim is to teach the skills and informations pertaining to the hand tools used in woodworking with such problems that will tax the abilities of the best students.

In Pattern Making and Foundry the aim is to teach the skills and information pertaining to that trade with problems that are best suited to cover these practices.

In Cabinet Making the hand tool skills are again brought into use, the additional skills and informations are the machines and the art of cabinet making, with such problems that are in keeping with the time or trend of times.

In Millwork we produce the furniture and equipment for the institution. In this course we aim to teach the machine skills and the making of duplicate pieces correctly, such as a modern mill does in its production.

The articles made in all the shops are finished in the Finishing course. The aim here is to teach the skills and informations as they apply to finishing in all its phases such as varnish, lacquers, stains, waxes, etc.

# DRAWING

The courses offered in drafting include Mechanical, Engineering, Freehand, Architectural, Furniture, Machine, and Geometrical. Both the theory and practice treatment are covered in all of the courses.

Students who are planning on being draftsmen avail themselves of all principles of good drawing, as all problems are executed in these courses.

Instruction in practice is given by examples, wherein problems are arranged in sequence to form a graded series beginning with the simplest to the most difficult problems. Working drawings are produced from models and work becomes very interesting to the future draftsman. The success of such students depends on their ability to analyze subject matter.

Students under the supervision of Prof. O. A. Hankammer and Prof. E. W. Baxter make layouts for their productive work in their shop courses. Many of the cabinets, chairs and other school work that are produced in the College shops require the services of a draftsman before the projects are built.

## MACHINE SHOP

The Machine Shop is equipped with machines and hand tools necessary for giving the student an insight into the fundamental techniques and methods used in the metal working industries.

The content of the course offered is arranged to give the student a knowledge of the following types of related materials: the reading of drawings, the designing of machine parts, oxy-acetylene welding, various alloys and their use, and the standards used in tools and materials.

Through practice the student is brought to carefully consider the following fundamental points: the specifications, the machines suitable for doing the work, the tools to be used, methods of holding the work, the proper speeds and feeds to use, and the sequence of operations.

# UPHOLSTERING

Furniture upholstery has long been regarded as a secret trade, and the number of masters in art does not exceed the demand.

The work in the furniture upholstery is in charge of Prof. Geo. E. Braley. A study of the tools and materials used in making of slip seats, spring construction, the sewing of outside covering, the over stuffing of new and reupholstering of used furniture are involved in the courses of upholstery.

The classes in furniture upholstery have constructed davenports for the girls dormitory and other school furniture. Students have the opportunity to solicit outside work and get a practical knowledge of upholstery.

The classes that were organized in upholstery 14 years ago had very simple equipment and met with the idea of experimenting, while at present the department has installed numerous tools and machinery and has endeavored to carry out the instruction that is best suited for a student in learning the upholstery trade.

## PRINTING

The volume of school printing jobs makes it necessary for the professors and students of printing to spend many extra hours in the college print shop in order to finish a given job on time.

This shop, where may be heard at all hours of the day the steady hum of presses and line casting machines, is one of the best in the colleges and universities of the middle west and is managed on the basis of a real commercial shop which provides for much valuable practical experience for the students of printing.

The production of the 1933 Kanza, Music Festival pamphlet, Collegio, Gleaner, Techne, and other numerous jobs for the school, show the quality of work done in the printing department.

The equipment in this department meets with satisfaction as compared to the best printing schools, and therefore brings students from varied states.

# ART

The aim of the Art Department is two-fold: first, to prepare students to meet the demands of the public school for supervisors and departmental teachers of art; second, to train those who hope to make art their life work.

Art Education courses prepare students to meet the demands of the public schools in art.

Poster and Advertising classes are valuable for those who expect to enter the commercial art field as well as for those who expect to teach.

Design Composition and Water Color classes furnish skills and an understanding of the fundamental principle of art structure.

Art Appreciation courses consist of a study of the world's masterpieces in architecture, sculpture, painting and the minor arts with reference to recognized principles of art.

The subject of crafts or applied arts has come in recent years to be looked upon as a most practical means of teaching art principles. The increasing popularity in the field of crafts for junior and senior high schools as well as in boy scout, girl scout, and summer camp art activities has brought an ever increasingly number of craft workers in the department.

The department is well equipped to give full courses in the following crafts: book-binding, leather tooling, metal craft, jewelry, design, basketry, clay modeling and pottery.

Elsie Leitch Bowman, B. S., Professor and head of Department, is a graduate of the Chicago Art Institute. She also has a diploma from the Applied Arts School of Chicago and has spent two summers traveling and studying in Europe.

Bertha A. Spencer, A. M., associate professor of art, spent one summer studying art in Europe.

# EXHIBITS

## ETCHING

As a result of the widespread liking for etchings, the College Art club has brought a collection of them for exhibition to the students. A display of etchings was sent to the college by the Alden galleries in Kansas City. Much attention was focused on dry points by Frank Brangwyn who painted murals on the capital building of Missouri; several etchings by Lee Hankey an outstanding British artist, and an original sketch by Joseph Prennell, also sketches were sent by Berger Sandzen and C. A. Seward of Kansas City.

## ART WORK BY FORMER STUDENTS

Foremost among the items on display were subjects by Waylande Gregory, a student here in 1921, '22, '23. Mr. Gregory did all the relief modeling for Hotel President in Kansas City.

Marcia E. Mendenhall, wife of Donald Snedden, who studied here also, collaborated a few pieces in art. Other students whose work was on display were: Robert E. Bartlett, John Wilkins, Harvey Zook, and Mrs. William Embree. Local persons contributing to the display work include Bob Isaacs, Mrs. Constance Arveson, Mrs. H. L. Roscoe, Mrs. J. M. Johnson, William Chadsey, and Prof O. A. Hankammer.

## PAINTINGS

Berger Sandzen, a Kansas City artist, who is also art director at Bethany College, Lindsborg, had placed on display a collection of about 30 pictures to the college student body and those interested in art.

## WOODCUTS

A series of wood-block cuts were on display by Miss Margaret Whittemore of Topeka under the auspices of the College Art club.

**M**ECCHANIC Arts was completed in 1925 under an appropriation of \$40,000 and it is one of the best equipped shops of its kind in this section of the state.

Mechanic Arts is one of the most interesting buildings on the campus of K. S. T. C. It is the working laboratory for mathematics, physics and chemistry and incidentally the home of the college busses. This building houses the following departments: Auto Mechanics, Mechanical Engineering, Electrical Shop, Radio Shop and Upholstering.

MECHANIC ARTS

## AUTO MECHANICS

The west half of the ground floor of the Mechanic Arts Building was designed especially for Automobile Mechanics. This is composed of a modern shop room 48 feet by 68 feet, with a tool room and lecture room adjoining. The equipment of the tool room and shop room is comparable to that found in the best commercial garages.

Theory courses are offered in internal combustion engines, lubricating systems, fuels and carburetors. Combination theory and practice courses are offered in automobile electricity and storage batteries. Practical repair work is offered in garage practice courses. These courses, together with other correlated shop courses, form the foundation for the preparation of automobile mechanics teachers or for those who wish to enter the trade.

Automobile Mechanics offers exploratory experiences in determining the interests and abilities of the student. It develops an appreciation of the work of the trade. It has a practical value to the student from a consumer's standpoint. It also gives opportunity for definite vocational training for those who wish to enter the trade.

The 1933 KANZA . . . . .

# ELECTRICITY

Students at this institution have three reasons for the study of electricity. First, to prepare for teachers of science and industrial subjects in the large high schools; second, foundation courses in engineering; and third, training for a semi-professional career.

The prospective teacher approaches from both the theoretical and applied sides and develops plans and technique for organizing, presenting and testing subject matter for class and shop. The young engineer takes several electrical subjects during his first two years, where time permits, to lay a foundation for his higher college work by early study of the fundamentals and their applications. The last mentioned group are the young men who, for one reason or another, find it undesirable to spend four years or more in a professional electrical engineering course, but who see the need of training in the essential principles to fit themselves for semi-professional employment in electrical trades and industries. This work is completed here in two years and many have availed themselves of it in the past with profit and success.

## VOCATIONAL INSTRUCTION

The Department of Smith-Hughes Vocational Education is a service organization planned especially to help in the organization and operation of vocational evening school and day school work.

Trade and industrial evening classes are conducted by twenty-one local boards of education. Day trade classes are conducted in six of the Kansas cities. It is our privilege to help the teachers of these classes in any way possible in being of greater service to those enrolled in their classes.

The director travels about 30,000 miles each year making personal contact with superintendents and teachers.

We have a well equipped office in Mechanic Arts Building and issue from time to time service bulletins to teachers of trade classes and local directors of evening classes. Through cooperation of the Department of Printing at the College, we are able to issue from time to time vocational bulletins which will help in the promotion and better understanding on the part of the people of Kansas just what opportunities are available for vocational work in the local communities. We fill requests from every state in the Union, Porto Rico, Hawaii, and even have filled requests from Soviet Russia.

Miss Norma Tomasi, a former student of Kansas State Teachers College, is the office secretary and handles some 30,000 pieces of mail during the year.

Each June, this department operates two 5-day janitor short courses. One at Pittsburg and one at some such central point in the State as Wichita. A faculty of twelve expert janitors and heating and ventilating men give instruction to 100 or more janitors.

A traveling air brake instructor, Mr. C. M. Drennan holds five-weeks short courses especially for railroad workers and we assist him in making his local arrangements.

In addition to this, the director of this department acts as assistant supervisor of trade and industrial education for Kansas helping Mr. C. M. Miller as state director.

PORTER library was completed in 1929 at a cost of approximately \$150,000. The equipment and furnishings cost an added \$30,000 and the building is complete in every detail.

The name recalls Senator E. F. Porter, who worked so earnestly for the college in its early years. It was he who bore the blunt of the battle with the Legislature for about sixteen years, and did untiring work without which in all probability there would be no Kansas State Teachers College at Pittsburg.

PORTER LIBRARY

## LIBRARY STAFF

The college library exists today for three purposes—that of instruction, if investigation, and as a means of attaining culture. The library of our college was planned specifically with a view to its use in instruction. The three large reading rooms, stack cubicles and seminar rooms serve the needs of both undergraduates and graduates. The library resources are being rapidly increased to meet the demands for investigation and for developing the culture side of education.

In addition to the librarian, Miss Odelle Nation, B. S., the staff is composed of Anise Sandford, A. B., Mary E. Sherfy, A. B., and Esther Park, B. S.

• • • • • The 1933 KANZA

MUSIC hall, a large building on the campus devoted entirely to the School of Music, is a most attractive building. It is a three story structure and every convenience for the study of music was considered when it was designed.

An auditorium with a seating capacity for six hundred people centers the first and second floors and the room is equipped with a fine pipe organ.

MUSIC HALL

# MUSIC

The purpose of the Music Department is to create and develop a sincere appreciation for music in both the students majoring in the department and for those whose interest lies partially in music; at the same time to train teachers to develop this appreciation in their students.

We are proud because the department has grown, both in the more efficient organization of the curricula and in the number of students specializing in music.

Members of the department are: Florence Kirby, Rose Buchmann, B. Mus., Esther Stewart, A. B., Otto Booker, Margery Jackson, Rhetia Hesselberg, Gabriella Campbell, B. S., Edna Fowler, B. S., and Professor Walter McCray, Mus. B.

## MUSIC

The School of Music is stressing three phases of music education—leadership, creative talent and appreciation. Courses designed to develop leadership include practical work in orchestra, chorus and band, also private instructions in voice as well as in piano, violin, organ and other musical instruments. Theory courses under efficient instructors have a place in the music curriculum. The Music Faculty this year is as follows: Walter McCray, Mus. D., Florence Kirby, Rose Buchman, B. Mus., Ruth Stamm, B. Mus., Esther Stewart, A. B., Otto Booker, Marjory Jackson, Rhetia Hesselberg, Edna Fowler, B. S., and Philipp Abbas. The addition of Mr. Abbas, noted cello and bass instructor, brings strength to the Department.

The Glee Clubs and the College Band are open to students desiring special training. The Festival Chorus gives opportunity for townspeople and the student body to continue their study of music. The year is quite promising for the Department with many of its majors returning and we find too the Freshmen class has its share of both music majors and minors.

Two of our outstanding attractions this year are the Spring Music Festival, which was held April 24-30, and the Interstate High School Music Contest. These two events bring hundreds of young people to our campus who are trying for honors in various lines of music.

It is the aim of the Music Department each year to meet the demand of the public in the music world.

## FESTIVAL CHORUS

The Festival Chorus under the leadership of Dr. Walter McCray was organized nineteen years ago. This offers opportunity for the students and townspeople to study the great choral works and to come in contact with noted artists.

At the holiday season the organization prepares an evening of entertainment centering around the Christmas festivities, opening the doors to the public.

During the Spring Festival the Chorus appears in two evenings of delightful music. From year to year the rendering of "The Messiah" by George Frederick Handel is looked forward to with great anticipation by all music lovers.

Southeastern Kansas and surrounding states take advantage of the opportunity to attend any program presented by this group of trained singers.

## FESTIVAL ORCHESTRA

In the fall of 1914 the Festival Orchestra was organized to accompany the first presentation of "The Messiah." Since that time the group has grown in number as well as in talent. The organization which consists of sixty pieces has a complete symphony orchestration and this year it has appeared in many leading Kansas and Missouri cities presenting outstanding programs. With Phillip Abbas and Rhetia Hesselberg heading the strings the orchestra will excell all past records. The Festival Orchestra gives students an opportunity to receive special training in orchestra work as well as to prepare teachers to meet the demands of the community wherever he may be employed in the future.

## MEN'S GLEE CLUB

The Men's Glee Club gives opportunity for students to study a variety of delightful choral music and to appear in concerts both on the campus and in various cities at intervals throughout the college year. Auditions for the club are held every fall. A quartet is organized from the club and meets with hearty applause whenever it appears. The club is an important part of the Festival Chorus which gives two concerts in the Spring Festival each April. This spring they are to appear with a chorus under the direction of the well-known composer, Charles Wakefield Cadman.

The personnel of the club is as follows:

### First Tenors

A. B. York  
Paul Hausman  
G. N. Harris  
George Pettit

### Second Tenors

John Shafer  
Maurice Hardiman  
Marcello Lisher

Ralph Crawford  
R. K. Henderson

### Quartet

Paul Hausman  
John Shafer  
Harl Palmer  
Clair Mills

### First Bass

Ben Ahrens  
John Haberbosch

James Kerr  
Harl Palmer  
David Evans  
Arnold Gobetz

### Second Bass

Clair Mills  
Paul Huddle  
Kermit Bohrer  
George Sharp

Conductor—Professor Otto Booker

Accompanist—Dean Croxton

## WOMEN'S GLEE CLUB

The Polymnia Club, the Girl's Glee Club, was organized to form the nucleus of the women's section of the Messiah Chorus. Since that time it has greatly increased in the field of its endeavors. The Glee Club is prepared at any time with a full hour's program and has served a great deal in community work. The Club's first appearance this year was the concert given for the Kansas State Teachers Convention. A program of much interest and value to the members was the Charles Wakefield Cadman program Festival week. The Club appeared in several numbers in joint recital with the Men's Glee Club under the personal direction of Mr. Cadman.

The members of the club are as follows:

### 1st Soprano

Ruth Askins  
Theola Chestnut  
Helen Crawford  
Frances Drury  
Clora Elder  
Reba Kirby  
Garnet Oliver  
Willanora Pratt  
Esther Sharp  
Dorothy Fae Swan  
Helen Stone  
Daphene Renick  
Mary Trout  
Maxine Wetzel

### 2nd Soprano

Mary Adele Brinn  
Delores Davis  
Edith Gorman  
Dorothy Lou Fowler  
Lois Hunt  
Jane Imel  
Clara Johnson  
Gladys Jones  
Doris Lyerla  
Reba Stansberry  
Frederica Theis  
Talitha Wallace

### 1st Altos

Joy Davison  
Margaret Lou Dunton  
Edith Hubbard  
Crystal Leeka  
Ruth Limb  
Margaret Theis

### 2nd Altos

Velma Askins  
Vera Miller  
Neila Martin  
Marie Matuschka  
Geraldine Pickeral  
Maxine Wilson  
Mildred Wallen

## COLLEGE BAND

The band has made a steady growth in the last four years from one of twenty to one of eighty pieces, and from one of a repertoire of marches to one of a repertoire of all standard overtures and classical selections with the customary marches and popular tunes for athletic contests. The band has become a regular feature in chapel and has left the stage of ballyhoo in which many college bands remain. Band is now a substitute for physical education credit. The band is headed on the march by the drum major, Wyatt Wells, and is under the direction of Harold J. Mould. This organization received many favorable comments during the past school year.

The 1933 KANZA . . . . .

# GOLD AND CRIMSON

(Alma Mater Song of K. S. T. C.  
Students and Alumni)

On the Plains of Southern Kansas,  
'Neath an ever cloudless sky,  
Far away from surging ocean  
And the storm bird's plaintive cry;  
With her prairies rolling westward  
Where the Redmen once roamed free;  
With her ensign proudly waving,  
Stands our dear K. S. T. C.  
  
Let her worthy sons and daughters  
For our College proudly stand,  
Shielding zealously her honor  
In one brave unbroken band;  
Let them hold aloft her banner  
With a stout and steady arm,  
Rallying her children round it  
From the city, town and farm.

## Chorus

Let us greet the Gold and Crimson  
With a strong and cordial cheer;  
Let our hearts be ever loyal  
To our Alma Mater dear!

WILLARD hall was erected in 1923 and formally opened in the second semester of 1924.

The Board of Regents accepted Dean Mitchell's suggestion that the name Frances E. Willard be given to the girl's dormitory. This home for one hundred and nine co-eds invites all college organizations to enjoy the companionability of its large open fireplace and massive beamed parlors.

## WILLARD HALL

Ten years' experience has demonstrated what a potent factor in establishing standards, a dormitory can be in college life.

The Hall is a veritable center for fun, frolic and fellowship as well as for privilege and preparation. College organizations of which a Hall resident is a member frequently hold their sessions in one of the parlors.

Christmas festivities including the tree, the carols at sunrise, the complimentary breakfast have become a campus tradition. No formal vesper service could replace the Sunday afternoon gathering before the open fireplace as music from the piano, victrola, or radio provides an atmosphere for fellowship which only college life affords.

While general supervision is vested in the Dean of Women, yet the more personal association is shared with the Secretary to the Dean, Mrs. Inez L. Risk, who this semester as resident director is proving herself the ideal personality to meet the "ins and outs" of the American co-ed away from home.

Years will not lessen the gratitude and appreciation every Willard Hall resident feels toward Mr. J. E. Lofton, the efficient custodian whose willing service the past eight years has warranted the current expression through the halls, "Tell Mr. Lofton and he'll fix everything O. K."

The latch string always hangs out for any member of the "Dorm Family" to spend a day or so as guests of Willard Hall.

MRS. HATTIE MOORE-MITCHELL,  
Dean of Women.

HEATING PLANT

*The 1933 KANZA . . . . .*

THE Stadium was completed in 1924. It is the gift of the students, alumni, faculty and citizens of Pittsburg to the College and the State of Kansas. The dedication ceremony was held on Armistice Day, November 11, 1924.

The track and athletic field is very modern and there is enough area to allow for several other playing fields besides the football field.

President W. A. Brandenburg has the distinction of being the man whose name makes up the title of the stadium---BRANDENBURG FIELD.

THE Gymnasium was erected in 1921 and completed in the following year. The cost was approximately \$100,000, and the building is located on the north-east side of the campus.

An immense floor space on which two basketball games may be in progress at the same time is perhaps its outstanding feature. The gymnasium is also comprised of a magnificent swimming pool, class rooms, shower baths, locker rooms and offices. Every minor detail in the building is built in an up-to-date fashion.

GYMNASIUM

## PHYSICAL EDUCATION WOMEN

The Women's Physical Education Department has a two fold responsibility. First, to meet the needs of the freshman and sophomore women, that is in regard to physical health, to appreciate her leisure time and to give her a knowledge of the techniques of games, sports, dances and gymnastics.

Second, to prepare those women who have chosen physical education as their major in the proper methods of teaching and to give them an understanding and appreciation of the needs of children.

The department sponsors the following activities: The Physical Education Major Club, The Women's Athletic Association, The Kwak Club, and the Intramural Program.

The instructors in the department are: Irma Gene Nevins, M. A.; Hazel Cave, M. S.; Ruth Wilson, M. A.; and Lucille Hatlestad, M. A.

## PHYSICAL EDUCATION MEN

This department aims to provide programs of physical activity which will help maintain the health and happiness of students while in college. It is the aim of the staff to plan the work so that it will have a carry-over value for the health and recreation of all after graduation. If called upon to assume responsibilities of the health and play of others it is hoped the courses have prepared all to measure up to such duties.

The department is charged also with the organizing and administering of inter-collegiate athletics. The past year K. S. T. C. has been declared Conference Champions in two of the three major sports—basketball and track. In football we were tied for second honors.

The following staff of instructors are all well qualified for their respective duties: Edward "Blue" Howell, B. S., Nebraska University, head football coach; Charles Morgan, B. S., K. S. T. C., Pittsburg, assistant coach and director of Intramural sports; John F. Lance, B. S., K. S. T. C., Pittsburg, head basketball coach; Garfield W. Weede, B. S., Sterling College, D. D. S., University of Pennsylvania, head track coach and director of athletics and physical education.

Special theory and practice in athletics and physical education courses are offered, the completion of which prepares students to direct such activities in schools and colleges. More and more is this phase of education being stressed and the department is gratified at the success of its men now out in the teaching profession.

Garfield W. Weede, D. D. S., Head of Department.

The 1933 KANZA

## MEMORIUM

### REQUIEM

Under the wide and starry sky  
Dig a grave and let me die;  
Glad did I live and gladly die,  
And I laid me down with a will.

This be the verse you grave for me;  
Here he lies where he belonged to be;  
Home is the sailor, home from the sea,  
And the hunter home from the hill.

—Robert Louis Stevenson.

We feel that our lives have been enriched by the accumulated wealth of fond memories which each succeeding year in dear old K. S. T. C. has brought to us.

Fact after fact, which we have learned, may be relegated to the dark pigeon holes of memory where the spotlight of attention will seldom find it, but the memories of the many happy days we have spent together will be our, always.

Dorothy Hill.....	Secretary
Laverne Schmaltz.....	Treasurer

With only one year more to spend at K. S. T. C., scurrying to class with a shiver lest Boreas pierce our frail garments, or stroll arm in arm around the oval letting Zepherus play in our hair, we look back on these three years. Picnics, serenades, quizzes, basketball, chapels, moonlight nights, concerts, notebooks, Ye Olde Inn, Y. W., carnivals, Noel, classes broken—parades—dances, "hell week," flunk cards, Kanza contests, all were some of the things crammed into the short years. But the fellowship and good times had during the back-stage scenes of the Junior Play compare favorably with any of these.

Let us go forward in our last year at K. S. T. C., keeping in mind the ideals of our school and having always a smile for our classmates on the plains of life.

# SOPHOMORE CLASS OFFICERS

## SOPHOMORE OFFICERS

Robert Anderson.....	President
Pete Farabi.....	Vice-President
Esther Chubb.....	Secretary
John Haberbosch.....	Treasurer

On Monday Sept. 12, 1932 there was a hail of greeting from one student to another; from one sophomore to another. As past freshmen the now sophies assumed the small step of superiority over last year.

The year started off with a bang, officers were elected and the good old college life began. Nothing particular happened during the first semester, but the last semester was exceptional outstanding for the sophomores. The sophies banded together in an allied pack to lead with a well attended line party to a down town theater, the first week of the second semester. This was only the start of a great success for the class. Committees were formed and well laid plans were put into effect to bring about the best entertainment for them during the year. It was known as the Sophomores One Big Party, and was given in April.

The Sophomores brought the year to a close by sponsoring the graduation of the Life Certificate Class; and then bid farewell to the school year of 1932-33, which is now recorded history in this outstanding year book, "The Friendly Kanza."

## FRESHMEN CLASS OFFICERS

### FRESHMAN OFFICERS

Milton Zacharias.....	President
Dan Shiel.....	Vice-President
T. L. Scanland.....	Treasurer
Marie Glass.....	Secretary

The Freshman Class of 1932-33 is one of the largest freshman classes in the history of the institution. The September enrollment was four hundred and one, thereby proving the old maxim that, although depressions may come, education remains the best investment for youth. Some of the class activities were: two line parties to the Midland, acting as host to over one hundred high school debaters at one of the freshman parties in the gymnasium, class banquet, and a picnic. Class sponsors are Miss Jennie Walker, Dean Mitchell, and Dean Small.

# GRADUATE OFFICERS

## OFFICERS

Lemoine Carlyon.....	President
Thomas E. Davis.....	Vice-President
Ralph Dellinger.....	Secretary-Treasurer

In spite of the depression that seems to be ruling the world to-day, the graduate students have traversed the halls of knowledge of the Kansas State Teachers College of Pittsburg on the average of 75 strong during the academic year 1932-33.

Of this group, 35 look forward to receiving the degree of Master of Science in May. The remainder have additional work to do to complete the requirements for the degree.

Graduate work is offered in the following departments: Biology, Chemistry and Physics, Education, English, History, Industrial Education, Home Economics, Mathematics, Music, and Psychology and Philosophy.

The choice hide-away of graduate students is the graduate section of Porter Library where they engross their time in thesis and research work, and endeavor to digest all the literature in their power.

The graduate students have managed to steal away from scholastic endeavor long enough to have three social functions during the year, in which they enjoyed the presence and association of the graduate faculty.

May the graduate division of the Kansas State Teachers College of Pittsburg continue to grow with each coming year.

The Pan-Hellenic Council, an assembly composed of both National and local Greek-letter sororities, was organized in July, 1920, for the purpose of fixing the date of Rush Week; passing and enforcing rush rules; regulating other matters pertaining to local Pan-Hellenic life; encouraging all chapters to take an active interest in all college activities for the common good; and to endeavor to strengthen inter-sorority sisterhood.

During the past year the Council presented a Pan-Hellenic Intra-Mural cup to the sorority winning first place in inter-sorority athletics. The social welfare project was the bringing of packages of food or clothing, which were distributed to charity at Christmas time. The organization also sponsored a Pan-Hellenic dance, given at the Mirza temple.

Lambda Sigma Kappa, Biology and Premedic Fraternity established on the campus of Kansas State Teachers College, Pittsburg, 1912.

This is a professional fraternity organized within the Department of Biology with the membership limited to majors in the various divisions of the Department.

The organization has established a very close relationship with the local medical organization whose members take part on the bimonthly programs frequently. One of the fraternity requirements is to prepare a scientific paper on some topic chosen from the field of biology. This work is under faculty supervision.

Kappa Mu Epsilon is an honorary fraternity for college students majoring or minoring in mathematics. Kansas Alpha chapter was installed January 30, 1932, with 27 charter members. Requirements for membership are: The completion of at least 15 hours of college mathematics, of which at least 5 hours must be in courses beyond analytical geometry; a high scholastic standing in mathematics and also in general scholarship; and an interest in mathematical meetings evidenced by attendance at the Mathematics Club.

There are now nine chapters in accredited colleges located in Oklahoma, Iowa, Kansas, Missouri, Mississippi, Nebraska, and Illinois.

The aims of the organization are to develop an appreciation of the beauty and the usefulness of mathematics.

Kappa Delta Pi is an International Honorary society in education that was incorporated under the laws of the state of Illinois, June, 1911. Dr. William Bagley is known as the founder. Its purpose is to encourage in its members a higher degree of consecration to social service, and to this end it maintains the highest educational ideals, and fosters fellowship, scholarship and achievement in educational work.

Juniors, seniors and graduate students, who have maintained a high record of scholarship, who possess leadership, and who declare their intention of taking their work from the Kansas State Teachers College are eligible for membership.

The Inter-Fraternity Council is represented by each fraternity president and one other member, whose duty it is to discuss the social standing and ratings of the fraternities on the K. S. T. C. campus.

It is through this council that action is passed in materializing any plans that might be needed by the fraternity.

Dean Small has acted effectively with the Council in suggesting rules to be followed out by the Greek-letter social organizations in promoting harmonious fraternal relationships.

The College Art Club was founded October 18, 1921, by students of the Art Department. It is affiliated with the American Federation of Arts.

Its purpose is to promote interest and appreciation of art. This year the College Art Club has sponsored monthly exhibits and has added more picture to the school's collection in the Music Hall.

## ARDEN PLAYERS

The Arden Players are a group of students, the personnel of two plays of the Society during each school year. The personnel changes with each production. Members of the casts are selected among candidates from the student body who wish to try out.

The first semester the Arden Players under the direction of Miss E. Madge Jones presented, "The Passing of the Third Floor Back," with the following cast:

Mrs. Sharp.....	Esther Pease
Stasia.....	Margaret Campbell
Miss Kite.....	Joy Davison
Mrs. Tompkins.....	Reba Stansberry

Oswald Kerins.....	Jack Burnett

# EDUCATION CLUB

The meetings of the Charles W. Eliot Education Club are open to all students and instructors interested in the teaching profession and study of educational problems. However, membership is restricted to those students recommended by a committee which makes its selection on a basis of scholarship, future promise and interest in teaching.

The club has three definite purposes: (1) To afford additional opportunity for acquaintance between student members and the education faculty. (2) To help learn the new things in the field of teaching. (3) To give opportunity for social and cultural growth.

The English Club is an organization of majors, minors and faculty members in the Department of English to further interest in language and literature. Meetings are held the first and third Thursdays of each month. Outstanding events in this year's calendar were a Shakespeare Musical Program and a May Day banquet at which the club's ideals of high standards in creative literature were exemplified.

The Home Economics Club was organized in December 1919. The purpose of the club is to further the intellectual and social development of its members, and to support and uphold the aims of the department.

The Home Economics bulletin, a student edited bulletin, has been issued quarterly since June, 1920. Its purpose is to keep the alumnae and student body more closely united in promoting the best interests of the department.

In 1903, when K. S. T. C. was founded, Y. W. C. A. was least in the minds of the founders. But seven years later on May 16, 1910, a Y. W. C. A. organization took shape. Twenty-nine students and seven faculty women became members.

During the last 23 years, the Y. W. C. A. has had a very steady growth. It is through the Y. W. and the Y. M. that many influential people appear on our campus. And, the latch is always out at the Y. W. house located at 111½ East Williams street. Girls, you are welcome.

The student Y. M. C. A. purposes to help college men to evolve and practice an adequate philosophy of life through discussion of life topics and talks on current issues by men whose experiences have given them an insight on the problems of American youth. This phase of the association's program has brought to the campus during the past year such men as Arthur Rugh, who, for 25 years, was national student secretary of the Y. M. C. A. in China; Harry W. Laidler, president of the executive board of the National Bureau of Economic Research; Jack Harte, pastor of the Sacred Heart Episcopal church on the campus of the University of Pennsylvania, who was the leader on the Y. M. and Y. W. C. A. retreat early in the fall; and Harold Colvin, general secretary of the student division of the Y. M. C. A. in the Rocky Mt. Region.

Pittsburg is a unit of the Rocky Mt. Region which includes the five states, Kansas, Colorado, Nebraska, Utah, and Wyoming. Pittsburg is represented on the Field Council, the governing body of the Rocky Mountain Region, by Carl Jackson, president of the local association; John Price, former president and former chairman of the Field Council; and George D. Small, general secretary of the local association, also served as members of the executive committee of the Field Council.

The Student Council consists of nine members—two from each of the four classes and a president elected by the entire student body. Acting in accordance with its constitution, the council initiates new policies, expresses student opinions, and assumes charge of all activities not controlled by other organizations.

The council this year has assumed wider obligations than ever before. Through its efforts speakers such as Governor Alfred M. Landon, Dr. John R. Brinkley, former Governor Harry Woodring, and other notables have been brought to the campus. It is with considerable pride that the council accepts the honor bestowed upon it by Dr. Brandenburg in his statement that the council this year has been the most efficient in the history of this institution. Members of the council receive the highest recommendation from all authorities when leaving the college. To be a member of this council one must receive the highest number of votes from the student body at large. The experience derived from this obligation is inestimable. All members of the council are leaders in all forms of college life.

Charles Waterman .....	Assistant Bus. Mgr.
Joy Davison .....	Assistant Bus. Mgr.

The Kanza Staff has attempted to introduce this year a rather complete representation of the K. S. T. C. personnel, including faculty members and student body.

In the yearbook we have made it possible to picture the activities of each department of K. S. T. C., which we feel sure the student body desired to have produced in the Kanza for some time. The staff hopes that this volume has achieved all the wishes of the student body and has represented this institution as all yearbooks should do. The theme in the 1933 Kanza has been well suited for this years book, and has involved a method of presentation that is unique in the Kanza history.

Credit is due Charles Waterman for the frequent calls in assisting the Business Manager sell the books to the many students.

Miss Joy Davidson responded effectively in her assistantship, and did splendid work in selling ads to local advertisers.

Miss Nonette Risk in her capacity as assistant editor gave valuable assistance in submitting editorial copy.

Bill Corporan has been responsible for all of the athletic division data and copy that is connected with this book.

The Collegio is the official student publication of the College and as such aims to reflect and record the life around the institution. The Collegio's purpose is three-fold: To record the routine news of the College; to serve as an advertising medium for the school; and to keep our alumni and friends informed as to the progress we are making.

The circulation of the Collegio is about thirty-five hundred copies. All the high schools in the state receive a copy of the paper each week in addition to our alumni circulation and our exchange list.

The news for the Collegio is collected and written by the students in the journalism classes under the direction of Prof. Ernest Bennett, who is Journalism Supervisor. The paper is printed by the students in the College Printing Department under the direction of Prof. Orville Young, Supervisor of Printing.

The editor and business manager of the Collegio are elected by the Board of College Publications. Assistant editors are chosen by the editor from the members of the journalism classes who show superior ability in journalistic work.

A number of young men and women who have received journalistic training in the College and have been connected with the publication of the Collegio are actively engaged in newspaper work today.

# Athletics

"DOC" WEEDE  
Track Coach

"BLUE" HOWELL  
Football Coach

"First in track, first in basketball and first in the runner-up honors in football," to parody a statement concerning our first president, sums up the success enjoyed by the athletic teams of Pittsburg Teachers during the sports season of 1932-'33.

Last spring "Doc" Weede developed the best track team that has been his fortune to coach since being at K. S. T. C. His aggregation swept all before it, taking honors in the Central Conference and the Missouri-Kansas Intercollegiate track and field meets. In some of the relays of the country, the Gorilla flashes took honors high, wide and handsome. Records were broken and records were tied by these boys wherever they went.

Head Coach Edward "Blue" Howell and Charles Morgan developed the best football team that has pranced on Brandenburg field since 1924, when the Crimson and Gold captured championship honors. Suffering only one defeat, the gridsters were

"CHARLEY" MORGAN  
Assistant Football Coach

"JAWN" LANCE  
Basketball Coach

compelled to be satisfied with runner-up honors in the Central Conference, sharing this position with Washburn. It is interesting to note that the team taking first place, Wichita, was decisively beaten by the Gorillas, 12 to 0.

When the basketball season rolled around, Coach John Lance had the big job of fitting in new men with his system. But fit them in he did, with the result that Pittsburg enjoyed once more the honor of first place in the conference. The loss of two conference games made it necessary to share this position with Wichita. But the superiority of Pittsburg can not be doubted when it is recalled that the Gorillas overwhelmingly defeated Wichita by thirty points in their first meeting, while Wichita, on her own court, eked out a three point victory.

Much credit is due to these coaches for the splendid work they have done and the great results they have accomplished. Taking advantage of any breaks in their favor and making the most of the breaks to their disadvantage, have produced teams that have brought glory, honors and reputation to Kansas State Teachers College at Pittsburg.

"Doc," "Blue," "Charley," "Jawn,"—our hats are off to you!

# FOOTBALL REVIEW

BILL CORPORAN

Six victories, two ties, and one defeat, was the record made for the 1932 football season by Coach "Blue" Howell's gridsters. Enjoying the best season since 1924, the Pitt Gorillas tied for runner-up honors in the Central conference. An early season tie with Southwestern prevented the Gorillas from taking undisputed possession of second place, which they shared with the Washburn Ichabods, who lost the championship to Wichita.

In conference play, the boys won four, tied one, and lost one. In non-conference tilts, the team was more successful, winning two and tying one. The Gorillas scored in every game, win, lose, or draw, excepting the final game with Springfield which ended in a scoreless tie.

Under the guidance of Coaches Howell and Morgan, the squad practiced daily a week before enrollment day. The advance season practice brought out around forty men, including twenty-two lettermen who reported for the first session. After the opening of school, when the coaches issued the regular call for candidates, about sixty men reported, including nineteen lettermen.

In the opening game of the season, the Gorillas traveled to Rolla, Mo., Sept. 24 to meet the Missouri School of Mines. Adam Kahler was the mainstay of the Pittsburg offense and the passes he so accurately flipped resulted in two touchdowns, enabling the Gorillas to win, 13-0. In the first quarter, a pass from Kahler to Tims was good for six points. Moriconi promptly added the extra point from placement. Again in the final period, Kahler passed to Grossman for 33 yards on the Rolla 3-yard line. Kahler took the ball over for another touchdown, placing the game on ice. Moriconi's kick from placement was low.

Playing their first home game of the season, the Gorillas took the count of the Maryville teachers, 25-0, Friday night, Sept. 30. The Pitt team left nothing to be desired as far as blocking backs, a charging line, and scoring potentialities were concerned. Early in the first quarter, Kahler and Moriconi alternated at carrying the ball, Kahler finally taking it over from the 7-yard stripe. The same procedure was followed for the second counter and the game was assured when McCoy intercepted a pass and placed the ball in scoring position on the 35-yard line, from where "Mac" scored on a cutback play. In the last period, Kuplen, guard, intercepted a Maryville pass and raced for a touchdown.

Encouraged by their success in non-conference frays, the Pittsburgers journeyed to Winfield Oct. 7 to play the Southwestern Moundbuilders in a conference clash. The best the Gorillas could do was to gain a 7-7 tie. The team was seriously handicapped when Kahler and Tims were injured early in the first quarter and were unable to return to the game. The locals received the big break of the game in the second quarter when Southwestern punted only six yards on her own 13-yard line. With the aid of an offside penalty, McCoy took the ball off tackle for the Pittsburg touchdown. He kicked the extra point. The Gorillas led until the last two minutes of the game.

# FOOTBALL REVIEW

Southwestern blocked a punt in midfield and, by means of a long pass and short gains through the line, scored a touchdown, Mesch going over the line. Ossowski tied it up when he kicked the extra point.

College of Emporia was the guest of the Gorillas the next week-end Oct. 14, and departed on the short end of a 15-2 score. The Presbies drew first blood against the second team when a bad pass from center gave the visitors an automatic safety. Coach Howell rushed in the first stringers who lost little time in scoring. Early in the second quarter, McCoy slipped over for six points after a series of bucks, passes, and end sweeps. He added extra point from placement. In the third period Pittsburg added two points by dropping Prather, C. of E. tackle, behind the line for a safety. The scoring was concluded when McCoy passed to Tims for 18 yards and a touchdown.

On the night of Oct. 21, the Gorillas thrilled a great homecoming crowd by downing the Wichita Wheatshockers, 12-0. It was the first time the Gorillas had tested the Shockers at football for five years. The chief thrill of the game was furnished by DeHon, who, behind perfect interference and with the aid of his snaky hips, returned a punt 87 yards for a touchdown in the last quarter. The score came as a sort of a shock, as the crowd had settled down to see two equal teams battle to a scoreless tie. After the long run, the Shockers seemed to become demoralized and a little later in the game McCoy knifed through on a perfect cutback and raced 27 yards for the second touchdown.

After a week-end rest, the Gorillas went to Topeka to play the Washburn Ichabods Nov. 5. Each team was undefeated and the winner was doped to take the conference. The Topekans blasted all Pittsburg hopes for the championship by administering a 26-7 beating. The Ichabods played ball over their heads and scored 14 points in the first quarter. Again in the second period they counted another touchdown. In the final stanza, Kahler, who had not played since the Southwestern game, snapped a series of passes to Kennedy and Tims. Tims took one for a touchdown and Bethel snagged one for the extra point. Washburn again scored, bringing the final score to 26-7.

Coming back after their stinging defeat, the Gorillas were entertained by Emporia teachers Nov. 11 at Emporia and left there with a 19-13 decision over their host. This game was the first win over the Hornets since 1924. In the first quarter, Murphy recovered a fumble on the Hornet 18-yard line. McCoy ran 13 yards and Myers plunged five for the touchdown. Again the second period, the Gorillas scored when Kahler dashed 40 yards after Emporia had evened the count with a thirty yard run. In the final period, each team scored six points making the final result, 19-13.

Playing their final home game, the Gorillas entertained the Hays Tigers on a muddy field and bested the western Kansas outfit, 13-0. After several threats in the first half, the Pitt boys put across a pair of touchdowns. The first counter was scored when Grossman fell on the ball beyond the goal line after Woodruff, Hays quarterback,

## FOOTBALL REVIEW

had fumbled the ball two or three times on an attempted punt. In the closing minutes of the game, Moriconi smashed through the center of the line for a brilliant 38-yard sprint which placed the ball in scoring position. He carried the ball across on a line smash. A pass, Kahler to Grossman, was good for extra point.

In the annual Thanksgiving joust with the Springfield Bears, the Gorillas were held to a scoreless tie. On a soggy field, the Pittsburgers threatened a number of times, but the Bears put up a stubborn defense when the goal line was threatened. In the first half, Pittsburg drove to the Springfield 5-yard line to be held for downs. In the second half, Kahler filled the air with passes which had the spectators in an uproar. On four occasions the ball went to the Springfield 20-yard line, the advance being stopped by interceptions. Bethel featured in a spectacular play that carried the ball to the Springfield 13-yard stripe. He took a pass from Kahler to race for 47 yards before he was hauled down. On the next play, Kahler's pass was intercepted and the threat ended.

# TRACK REVIEW

BILL CORPORAN

The victory habit of the Pittsburg track and field teams showed itself in a grand and glorious way in the 1932 season.

The Gorilla speedsters and weight-tossers swept two dual meets with Emporia Teachers and Springfield Teachers. Then, keeping in great form, the Pittsburgers snowed under all competition to win the Central Conference and Missouri-Kansas Intercollegiate meets. "Grand slams" were scored in the Hasting, Nebr. College relays and in the college section of the Kansas relays. In addition to these performances, the boys acquitted themselves in a great manner in the Notre Dame and Drake relays.

Coach Garfield Wilson Weede, the great Pittsburg track mentor, who won his fifth consecutive conference title in 1932, called this team the best he has ever coached. And that is saying something! for "Doc" has established a coaching record here that has been that of one championship right after another, most of them featured by record-breaking performances.

In the dual meets the home boys soundly trounced the Emporia Teachers, 92 1-6 to 38 5-6, and walloped the Springfield Teachers to the tune of 98 2-3 to 34 1-3 score.

In the Central Conference meet, the Gorillas ran away from the field by scoring 69 points, while the nearest competitor, Emporia Teachers, picked up 33½ points.

Four new records were chalked up by the Gorillas in this meet. Terwilliger and Davis raced around the oval to set a new mark in the 440-dash, running the quarter in 49.5 seconds. "Long Bob" Schroeder sailed over the bar at a height of 6 feet 5½ inches, which established a new record for the high jump. In the discus throw, Delbert White sailed the pan 141 feet 2 3-4 inches for a record in that event. Then the famed mile relay team, composed of Madison, Kirby, Terwilliger, and Davis, handed the baton to each other so fast as to record a mark of 3:18.7.

In the inter-state-meet, which was held at Kansas City, "Doc's" boys landslided the opposition to take the meet with 102 points. Washburn was a poor second with 39½ points.

In this meet, the tracksters hung up two new records and tied one. Swisher dashed the 220 in record time, completing the furlong in 21.7 seconds. In the broad jump, Madison leaped 21 feet four inches for the other new mark. Dale Smith, miler, equalled Harold Manning's record of 4:22.3

At present, the track team holds seven Central Conference records and eight Missouri-Kansas Intercollegiate records.

At the close of the season, twenty-one men were awarded letters. One of them, Bob Schroeder, competed in the final Olympic high jump tryouts at Palo Alto, Calif.

Although five lettermen—Vanek, Schroeder, Ratzlaff, Madison, and Conard—were lost through the graduation route, prospects for the 1933 season are indeed bright. Promising new men reporting for this year are: Opal Courtney, freshman, Gary, Indiana, hurdles, broad jump, and high jump; Winson Tingley, freshman, Arkansas City, pole vault; Harold Wilhelm, freshman, Arkansas City, hurdles and relays; and William Cox, junior, Elk City, sprints and relays.

The 1932 season's record of the Gorillas:

Notre Dame relays—Tied for first in high jump, Schroeder, 6 feet 4¾ inches; tied for third in high jump, second in half mile run, fourth in mile relay, third in shot put.

Hastings, Neb., College relays—First in mile relay, 3:22.3, setting new record.

The 1933 KANZA

## TRACK REVIEW

first in half mile relay, 1:29.6, setting new record; first in 2-mile relay, 8:01.6, setting new record, first in sprint relay, 3:35.9, setting new record; first in high hurdles, Ratzlaff, 15.4 seconds, setting new record; first in 100-yard dash, Swisher, 9.9 seconds, setting new record; first in high jump, Schroeder, 6 feet 1-8 inch, setting new record.

Kansas relays—First in mile relay, first in half mile relay, first in 2-mile relay, first in distance medley relay, third in high jump, third in discus throw.

Drake relays—First in half mile relay, 1:27.6, setting new record; third in 2-mile relay, second in mile relay, second in sprint relay, first in discus throw, White.

Dual meet—Pittsburg 92 1-6, Emporia Teachers 38 5-6.

Dual meet—Pittsburg 98 2-3, Springfield 34 1-3.

Central Conference meet—Won with 69 points, Emporia Teachers 33½, Washburn 23½, Wichita 21, C. of E. 10½, Southwestern 6, Hays 1½.

Missouri-Kansas intercollegiate meet—Won with 102 points, Washburn 39½, Emporia Teachers 39, Baker 17, Maryville 14, Warrensburg 9½, McPherson 6, William Jewell 4.

## CENTRAL CONFERENCE STANDINGS

Teams	W	L	Pct.
Pittsburg .....	10	2	.833
Wichita .....	10	2	.833
Southwestern .....	7	5	.583
Washburn .....	6	6	.500
Hays .....	4	8	.333
C. of E. ....	4	8	.333
Emporia Teachers .....	1	11	.058

Coach John Lance and his 1932-'33 edition of the Gorilla basketeers ended the season in their accustomed position in the Central Conference standings,—on top. By winning ten and dropping only two conference games, Pittsburg shared the top step with the Wheatshockers of Wichita University.

Of the last nine championships the Lancemen have won four and tied four. The triumphant march this year was in direct contradiction to pre-season dope of the experts including Coach Lance himself. The season's record was all the more remarkable because of the fact that the starting five had two freshmen.

In non-conference play the boys dropped only one game and came out victorious in six. The season was ended with sixteen wins and three losses.

This season was the last for Ernest Schmidt, stellar Gorilla center, who received cognomen of "One Grand" Schmidt. Ernie received this appellation because, in his entire college career, he scored exactly one thousand points. The one thousand point mark was set up as a goal for the great center by sports writers and friends and he delivered the goods in great style. "Smitty" made the all-conference team for the fourth time and, while playing with the Hutchinson Renos, was named captain of the second All-American team.

Adam Kahler, dependable guard, will also be lost to the team for next year via graduation route. All other members of the squad are expected to be back next year to aid "Jawn" in developing another team of championship calibre.

The two freshmen on the first five fitted into the gaps made by last year's graduation and staged very creditable performances. John Edwards, flashy little guard, showed the way and ended up his first season with the Gorilla by being placed as guard on the all-conference team. Joyce Herrold, the other freshman, played at forward and, although not a prolific scorer, was one of John's best floor men.

The other member of the starting five, Jesse Eastman, played his first year on the Gorilla team this year at forward. "Big Ben" hit 'em from all angles during the season and ended the season among the high ten in the conference individual scoring race.

The Gorillas started the season with a bang, winning three non-conference games. They whipped Ottawa, Tahlequah, (Okla.) Teachers, and Durant, (Okla.) Teachers in order. The Durant game was played without the services of Schmidt and a victory was barely eked out.

Conference play was opened against the two Emporia teams at Emporia and the Pittsburgers came from behind to win both tilts. Then the highly touted Wichita team was played at home with the odds greatly in favor of the Wheatshockers. The Wichitans in previous games had swept all before them, scoring a point a minute, but the game here proved to be a rout for the Gorillas.

In quick order Southwestern, Springfield, Maryville, and the two Emporia teams were vanquished. But in the game at Springfield the home team was set back by

The 1933 KANZA

# BASKETBALL REVIEW

(Continued)

the Missourians in a hard, rough and tumble battle. Unable to snap out of the slump, the champions were shaded by the Washburn Ichabods at Topeka by two points.

For two games the Lancemen found themselves and defeated the Hays Tigers at Hays and returned home to administer a two point defeat to the visiting Maryville Bearcats. But again, at Wichita, they took it on the chin.

The season was finished with triumphs over Southwestern, Hays, and Washburn. In the Washburn game, Schmidt lacked exactly fourteen points to make his "one grand" total, and make fourteen points exactly he did, which gave him also first honors in the conference individual scoring race.

The scoring record:

Pittsburg 42; Ottawa University 31.  
Pittsburg 49; Tahlequah, Oklahoma 18.  
Pittsburg 37; Durant, Oklahoma 32.  
Pittsburg 35; College of Emporia 30.  
Pittsburg 38; Emporia Teachers 34.  
Pittsburg 52; Wichita University 22.  
Pittsburg 57; Southwestern 26.  
Pittsburg 30; Springfield Missouri 19.  
Pittsburg 22; Maryville, Missouri 19.  
Pittsburg 42; College of Emporia 31.  
Pittsburg 61; Emporia Teachers 27.  
Pittsburg 21; Springfield, Missouri 32.  
Pittsburg 34; Washburn College 36.  
Pittsburg 35; Fort Hays State College 23.  
Pittsburg 29; Maryville, Missouri 27.  
Pittsburg 35; Wichita University 38.  
Pittsburg 26; Southwestern 20.  
Pittsburg 33; Fort Hays State College 15.  
Pittsburg 43; Washburn College 36.  
Total points 721; Opponent's points 516.

# O ALMA MATER, BEACON BRIGHT

Edgar Nelson Mendenhall, Ph. B.

O Alma Mater Beacon Bright  
Of southeast Kansas plains,  
Thy sons and daughters lilt their love  
In these deep heartfelt strains.  
Thy classrooms, halls, thy fields of strife  
Our heart-strings intertwine;  
Our souls, our minds thy imprint bear,  
Their dross thou didst refine.  
Pierce darkness, Mater, shed thy rays  
Upon tradition's chain;  
Unfetter minds and haste the time  
When Truth and Justice reign.  
Shine on, O Alma Mater, Beacon Bright  
Of southeast Kansas plains,  
Light others' steps to heights beyond  
Our vision and refrains.  
Burn bright, O Beacon; in our hearts  
Shall altar embers glow,  
Vestalled by Love's eternal flame,  
Unquenched by Age's snow.  
O Alma Mater, Beacon Bright  
Of southeast Kansas plains,  
We pledged our constant love for thee  
In these, our heartfelt strains.

"---And Many Friends I've Met."

## STAFF ACKNOWLEDGEMENT

The Staff of the Nineteen-Hundred and Thirty-three Kanza takes the opportunity to express the appreciation and gratitude for the cooperation and assistance which the following have rendered in making possible this volume.

The faculty of K. S. T. C., student body and organizations responded splendidly in delivering to the staff all necessary material asked of them.

To the printing department of K. S. T. C. goes the credit for the printing of the Kanza in a limited amount of time. Prof. O. C. Young who supervised the work with such capable men as R. J. Nevins, F. O. Runyon and W. J. Newell and student assistants diligently working on the annual.

Miss Minnie and Mr. Wilbur Ferguson on all occasions gave the best courteous service to the staff, aiding them in photography work as well as giving them the privilege of using their rooms for paneling purposes.

Sincere appreciation is expressed for suggestions made by Bill Dillman which were developed and used in the 1933 Kanza.

Recognition is due Prof. O. A. Hankammer who contributed his time and all other available information necessary in publishing such an annual.

Carl Jackson who took interest in assisting with the layout work and Archie Petentler also willingly gave his assistance in the selling of ads.

Thanking all who have helped in the production of the 1933 "Friendly" Kanza.

Sincerely,

Stanley Hlasta, Editor

Sam S. Kliewer, Bus. Mgr.

# WE THANK YOU!

---

The business men of Pittsburg and the surrounding community have whole-heartedly accepted the spirit of the 1933 Friendly Kanza and the staff wishes to thank them for their kind cooperation in making this book a success. We feel that it is only through a feeling of friendship between the community and the College which serves it, that the greatest amount of good may be accomplished.

Pittsburg, as well as the College, is especially fortunate in having business men so loyal to the worthy causes which they heartily support.

We want the students of K. S. T. C. to support the men whose advertisements appear in these pages. It is upon foundations of such men that our institution is built, and may the Friendly Kanza be especially friendly to them.

We thank you, merchants of Pittsburg.

The young man walked through the door with furtive glances from side to side. He was scarcely noticed by the people in the crowded room. His coat was pulled up about his ears and his chin quivered with excitement. One hand was placed in a pocket of his coat and the fingers of the other drummed nervously. He walked with a grim determination toward a gentleman who stood near the cash register. His eyes became slits of intensity and in a vibrant and hushed voice he hissed, "Clark, could you cash a check for me?"

## STUDENT COLLECTOR SURPRISED BY BUG

A member of the "Intelligentsia" of the college strode bravely forth one fine day in spring to pursue his favorite hobby, that of collecting bugs.

It was not long before the object of his search was observed running along the path ahead of him. With collecting bottle in one hand, and a twig in the other with which to shoo the little animal, he knelt incautiously over the escaping insect.

He soon became painfully aware of the skill with which certain bugs can protect themselves, for this crafty little creature shot, with blinding effect, a tiny stream of the most acrid, pungent disgusting fluid, straight to the eye of the collector.

The stink bug, as it is called, is found in our gardens throughout spring and summer, and is easily recognized. It is a half inch long, and on its back is a well-formed shield. The insect is of bright green color. Because of its effective manner of self-protection, birds do not bother it. It is properly called the "skunk of the insect family."

## (EXTRA)

### TIRANDO EL TORO SOLVES PROBLEM

After two days conference with President Roosevelt and Joe Beitzinger, Charley F. Waterman, eminent columnist and doorbell repairman, has presented a plan which

## AROUND THE OVAL

is expected to immediately relieve the present banking panic.

For 48 hours, the master minds sat behind closed doors with beer steins and pretzels before them, while newspaper reporters got cauliflower ears from listening at key holes. The first day was a dramatic silence, broken only by suppressed gurgling and the business like crackling of pretzels. It was toward evening that the president was dragged from the conference chamber, babbling hysterically. Early the following morning, Beitzinger was seen to leap from the window and slide down the flagpole to the ground. Witnesses report that he was either frothing at the mouth or had forgotten to blow the foam off the last quart.

That evening Waterman presented the following revolutionary proposal to the White House janitor: All business is to be discontinued until legislation is passed concerning the plan. Only hamburger stands and lending libraries are to remain open. The main features of the plan are as follows:

1. Banks will be discontinued and the medium of exchange will be cigar coupons to be issued by pool halls selected by county school boards.
2. Spitons will be installed on all street corners in order to bring forth hoarded chewing tobacco and tinfoil.
3. House to house salesmen will pay a fee of 25 cents for every house visited.
4. The war debt will be quadrupled and paid, or we will whip the socks off somebody.
5. All jig-saw puzzles will be assembled in the New York Stock Exchange and turned over to the navy for bombing practice.
6. All columnists will be pensioned to the amount of \$84,321.00 per year.
7. Teachers will pay \$3.50 per week to the national treasury for the privilege of practicing upon American children.

### Just Imagine:—

1. Professor Bennett as a nerve specialist.
2. George Small as a race car driver, with Irwin Luthi as his mechanic.
3. Doctor Wyckoff as a sign painter. (We never realized how hard that name is to spell, before).
4. The editor, running a hot-dog stand.
5. Ted Harvey as a debator. Pf-f-f-t for you, Harvey).

Please excuse us as we are going to write a letter to Myrna Loy. It's been a long time since we heard from her.

Notise, Superintendents, principals, and school board members:

If we do not flunk sociology, we will graduate this spring and will be available for a teaching position if enough endowment is offered. We know our grades are not so very hot but we did awfully well in practise teaching. We could whip every kid we taught. They did not catch us up much except on catch questions and we knew just as much as the smartest kid in the class. They always behaved well for us and were particularly good when the supervisor (that is the prof who helps us out) was around. It is hoped that you school board members will be broad enough to realize that grades are not everything, as many of the college profs had it in for us and tried to prevent our success. In addition to being a teacher, we can jerk sodas and have had a little praktikal experience in building chicken kooops. If you can not make a pretty high bid for our services, you had best not bother about writing to us as we do not want to fool with letters that will not do us any good. If you have a worthwhile propozition, wright to Tirando El Toro in care of the Collegio.

Professor Wilson has been waving that chair-lifting act in our face for four years. We still think there's a catch to it.

Miss Jones, just before the Junior Play, looking for a hangnail for one of the stage pictures.

Question: What is the mating cry of the wild wombat?

Answer: "Blimpf, Blimpf!" (often followed by short series of "Blimpf! Blimpf!")

Questions and Answers  
How many can you answer?  
One dollar for any question accepted and printed (.....and printed, get that, buddy?)

1. Who discovered America?
2. Who is the world's most popular columnist?
3. What is a gonvischo?
4. Who will be the next president?
5. What is Greta Garbo's main selling point?
6. How do some of the profs grade a semester's work? (Answer yes or no.)

1. Christopher Columbus.
2. Charley F. Watt.....Will Rogers.
3. Hanged if we know.
4. Roosevelt. (This is a question which we wrote for last year.
5. Her ability as an actress—that was the fifth one, wasn't it?
6. You can't answer that yes or no, you baboon.

# The Association

## OF FRIENDS

on the Pitt campus will long be remembered. Those who have been directly associated in the production of "The Friendly Kanza" will long remember the efforts expended for achievement. The aim has been to portray that spirit of Friendship that has been prevalent on the campus. We feel this has been done and hope every reader will have many happy reminiscences in perusing its pages.

WICHITA, KANSAS

## REMINISCENCES

THEY wore their hair high on their heads in those days—the young women who were students in the State Auxiliary Manual Training School. And often there was a bunch of broad ribbons on top the pile of hair. One suspects that “rats” were used to bolster up the pile.

There is no way of making sure about the “rats,” for the information about the coiffure of 1903 comes from the first catalog ever issued by the school which is now Kansas State Teachers College at Pittsburg, and one cannot dig under the surface of a picture for further information.

Although they may have “ratted” their hair, those first K. S. T. C. girls were not afraid of working with their hands. The old catalog, now on file at the College, shows several of them studying Manual training along with the men, denim aprons over their white dresses and plying tools at their individual benches as though to the manner born.

To one who knows anything of the history of K. S. T. C., the first catalog is fascinating reading. It is the book of Genesis in the history of the College.

The catalog issued last spring contained 324 pages. The first catalog contained 62 pages and even then was published in two parts, several months apart. And the only way there was of filling the 62 pages was to outline in elaborate detail the courses of study offered. The outline of the course in physiology, for instance, covers more than three pages. Nowadays the catalog compilers are compelled to crowd the descriptions of a dozen courses on one page in order to get the hundreds of courses in the catalog at all.

The first section of the first catalog was published July 1, 1903. It was called the “Announcement Number.” The second section followed in November. It was called the “Outline Number,” being chiefly given over to long descriptions of courses.

It is the second section alone that shows pictures of classes at work. There had been no classes to photograph before the July issue, for it was only the preceding winter that the legislature had authorized the establishment of the school. But the classes that enrolled in September quickly made the subject matter of a number of interesting photographs. So clear are they that a member of the those first classes could yet easily recognize almost all the students.

Two years only were necessary for completing the course of study. The first half of the first year one studied arithmetic, elocution, geography, manual training, and declamation. The next semester came algebra, English, general history, methods in the common subjects, manual training, and spelling. The first half of the second year one had bookkeeping and penmanship, rhetoric, school law and management, American history and constitution, manual training and pronunciation; the second half-year geometry, literature, physics, physiology, manual training, and essay. A few of these subjects ran only half a term.

This list is a far cry from the seminar in home economics education, steam turbines, advanced architectural drawing, poultry culture, applied sociology, economic geology, Horace Mann, etc., of the present catalog.

“As this school is an auxiliary to the State Normal School at Emporia,” reads the first catalog, “all grades made here will be accepted in that institution and counted toward graduation.”

The following paragraphs were quoted from the Burr Oak Herald

(Continued on Page 238)

# Kansas State Teachers College

Pittsburg, Kansas

The Kansas State Teachers College of Pittsburg is 30 years old.

The Kansas State Teachers College of Pittsburg enjoys full accreditation in the North Central Association of Colleges and Secondary Schools, also in the American Association of Teachers Colleges.

The Kansas State Teachers College of Pittsburg offers work leading to a college major in the following fields: Art, Biological Sciences, Chemical and Physical Sciences, Commerce, Education, English, Foreign Languages, History and Social Sciences, Home Economics, Industrial Education, Mathematics, Music, Physical Education, Psychology and Philosophy.

The Kansas State Teachers College of Pittsburg has both an undergraduate and a graduate school, or division. In the undergraduate division the following degrees were conferred last year:

Bachelor of Science in Education.....	150
Bachelor of Science in Commerce.....	23
Bachelor of Science in Music.....	11
Bachelor of Arts.....	19
Total.....	284

In the graduate division the following degrees were conferred last year:

Master of Science.....	19
Master of Science in Education.....	21
Master of Science in Industrial Education.....	5
Total.....	45

The Kansas State Teachers College of Pittsburg enrolled during the past year students from 82 counties in Kansas, 21 different states, and 3 foreign countries.

The Kansas State Teachers College of Pittsburg believes that the content of education is essentially both cultural and vocational; that preparation to do well any necessary and worthwhile work is education; that all useful labor is dignified and honorable; that all persons engaged in promoting and directing such preparation are educators.

The Kansas State Teachers College of Pittsburg believes that the development of the habit of work, of honesty, of economy, and independent thinking, is a necessary part of all education.

The Kansas State Teachers College of Pittsburg believes that the cost of education should be as economical for the student as is possible.

Estimated expense per semester:

Incidental fee.....	\$13.50
Hospital fee.....	1.00
Activity fee.....	3.50
Books.....	5.00
Board.....	55.00
Laboratory fees.....	5.00
Room.....	27.00
Total.....	\$110.00

Estimated expense for the summer session:

Incidental fee.....	\$13.50
Hospital fee.....	1.00
Activity fee.....	3.50
Books.....	5.00
Board.....	30.00
Room.....	14.00
Laboratory fees.....	5.00
Total.....	\$72.00

## REMINISCENCES

(Continued from Page 236)

of May 7, the editor of which was E. A. Ross, then president of the Board of Regents:

"The board spent Saturday at Pittsburg to arrange for the establishment of the Manual Training School authorized by the last legislature. The board of education placed at the disposal of the board any of their commodious and well appointed school buildings and the board found no difficulty in selecting a fine three-story building admirably suited to our needs and Prof. Russ, for several years superintendent of the Pittsburg schools, and a man in every way competent for the undertaking, was selected superintendent.

"The little city of Pittsburg has a population of about 1600 and the board of trade is composed of five men, wide awake to the needs of the town and thoroughly able to make their wants known. It is in the most populous portion of the state. It is a great industrial city. The manual training school was very properly located amidst such surroundings, and we confidently expect to see, within a very few years, a great educational institution built up at this place which will be a credit, not only to the city and state of Kansas, but the entire western country as well."

Mark the prophecy in these last lines. Could predictions be more accurate?

Pittsburg's advantages as a school city are set forth in part as follows:

"Pittsburg has one of the best public libraries in the state.—Some of the best musical conservatories in the West are located here.—The city sustains a popular lecture course consisting of men of national reputation and music of the highest rank. The course for next year: 1. Leland Powers. 2. Sherwood Quartette. 3. Katharine Ridgeway. 4. Roney's Boys. 5. Hon. J. P. Dolliver. 6. Father Kelly. 7. John Temple Graves. 8. Louis Favour.

"Pittsburg is the home of the author of "That Printer of Udell," the book which is attracting so much attention this season.—Pittsburg choral society is an organization of about eighty members.—The fall term of the State Manual Training School opens Tuesday, September 8."

The reader will note there was nothing in the last sentence to remind the prospective student that when school should open September 8, it would be for the first time.

Kansas club women had endorsed the new school. The catalog gave the resolutions they had adopted:

"The club women passed the following resolution at their state meeting in Wichita, May 6th:

"Whereas, The last Legislature passed a law adopting manual training as a course of study in the public schools of Kansas; and,

"Whereas, A state manual training school for the training of teachers for this work has been established at Pittsburg, Kan., therefore, be it

"Resolved, Since this is our own state institution, and none other like it west of the Mississippi river, that we indorse this school and pledge it our heartiest support."

Economical students, by forming a boarding club, managed that first fall to reduce the cost of their meals, for one week at least, to nine cents each.

There Are More Than 2,000  
TEACHERS of PRINTING

## THIS IS FRIENDSHIP

I love you, not only for what you are, but for what I am when I am with you.

I love you, not only for what you have made of yourself, but for what you are making of me.

I love you for the part of me you bring out.

I love you for putting your hand into my heaped-up heart and passing over all the frivolous weak things that you cannot help seeing there, and drawing out into the light all the beautiful, radiant things that no one else has looked quite far enough to find.

I love you for ignoring the possibilities of the fool in me and for laying firm hold of the possibilities of good in me.

I love you for closing your eyes to the discords in me, and for adding to the music in me by worshipful listening.

I love you because you are helping me to make, of the lumber of my life, not a tavern, but a temple, and, of the words of my every day, not a reproach, but a song.

I love you because you have done more than any creed could have done to make me happy.

You have done it without a touch, without a word, without a sign.

You have done it by just being yourself.

After all, perhaps this is what being a friend means.
